ERGO SPHERE

ERGO SPHERE

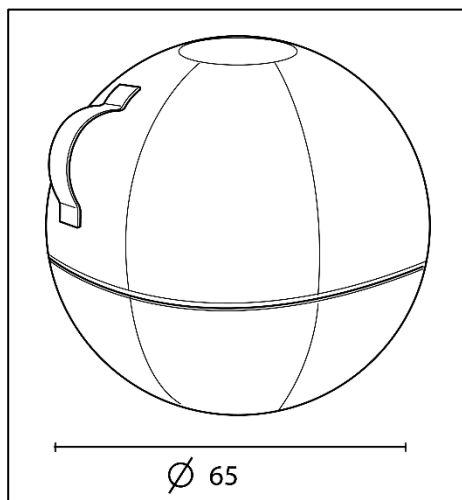

ERGO SPHERE

- **For optimal sitting and posture:** this 65 cm ball is perfectly suited to adults and children measuring between 1.55 and 1.85 m and supporting a maximum weight of 150 kg.
- **Ergonomic:** ERGO SPHERE is recommended for workers who sit all day, for people who want to improve their posture, for those who want to be active/dynamic even while sitting! But it can also be used for physical activities like yoga, Pilate, gymnastics or fitness.
- **Well thought out:** Ergo sphere is equipped with a double thickness in the lower part allowing the ball to stabilize on its own when no one is using it. This "tumble" function will prevent you from having a ball rolling in the middle of your room.
- **Against back pain, for dynamic sitting and better health:** The ERGO SPHERE ergonomic seat works balance and the abdominal belt and back muscles. Recommended by physiotherapists, it is perfect for sitting at your desk.
- **Felt Cover:** Quality felt fabrics with a soft touch. Thanks to its horizontal zip allowing full opening, you can put the cover in the washing machine (no tumble dryer) and quickly put it back on by only slightly deflating the PVC balloon.
- **Comes with:** This seat comes with 1 inflatable, anti-burst PVC inner ball, 1 foot pump, 1 washable felt cover with high-strength YKK zipper.

Diameter: 65 cm
Maximum weight supported: 150 kg
Inflation time: 5 minutes
Materials: PVC/felt cover

Characteristics

SAP no.	400165093
Color	Grey
Dimensions	Ø 65 cm
Warranty	2 years
Net weight	1,57
EAN code	3595560034628

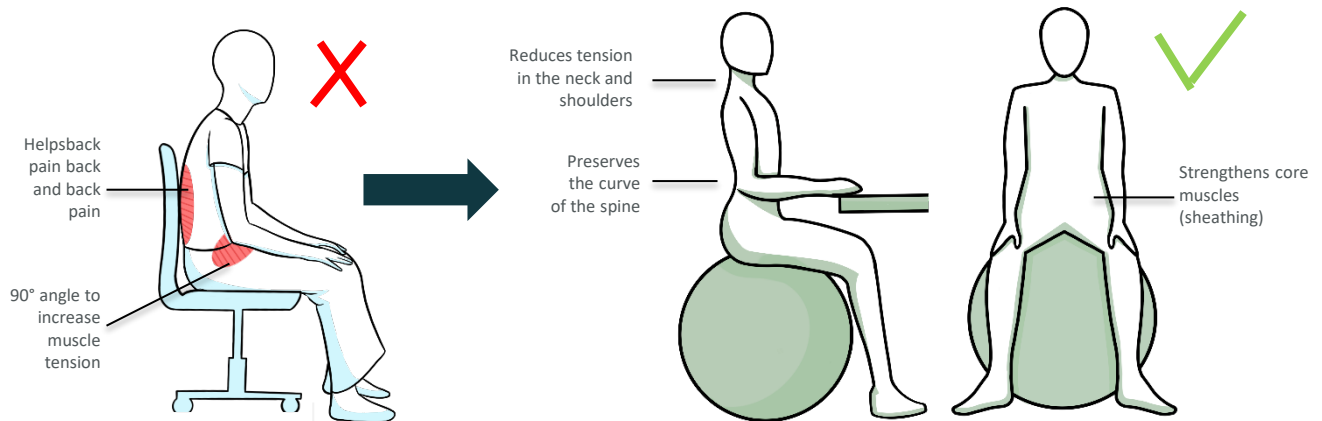

OUR CSR COMMITMENTS

1. All our lighting are **100% repairable** thus limiting planned obsolescence.
2. Reduce our carbon footprint through our **ECO-DESIGN THINKING** approach.
3. Contribute to the preservation of the planet's natural resources by promoting the use of **recycled materials**.
4. Optimize our packaging to control our **transport costs**.
5. Highlight the **talent of our employees** by ensuring social equality.

OUR EXPERTISE

Lutter contre la sédentarité

Following numerous studies, sitting will increase the risk of having heart problems while reducing life expectancy by 7 years. Indeed, the human body is designed to “move”, and not to remain almost still for 9 hours a day. Ultimately, this position disrupts the entire body (less well oxygenated) which leads to an increase in fat cells causing potential excess weight. Ideal for avoiding back, lumbar and muscular pain (shoulders, arms, back), our range of dynamic seats is designed to promote good posture in your spine by inducing the tilt of your pelvis and forming an open angle of 110° between your thighs and your spine, thereby reducing the tension exerted on your pelvic muscles. This natural posture prevents back pain and improves your muscle tone without hindering your movements.

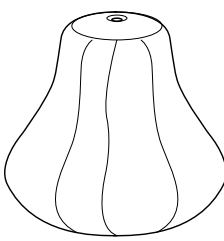

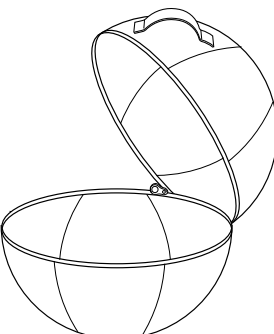

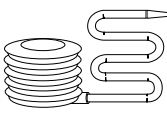

OUR CERTIFICATIONS

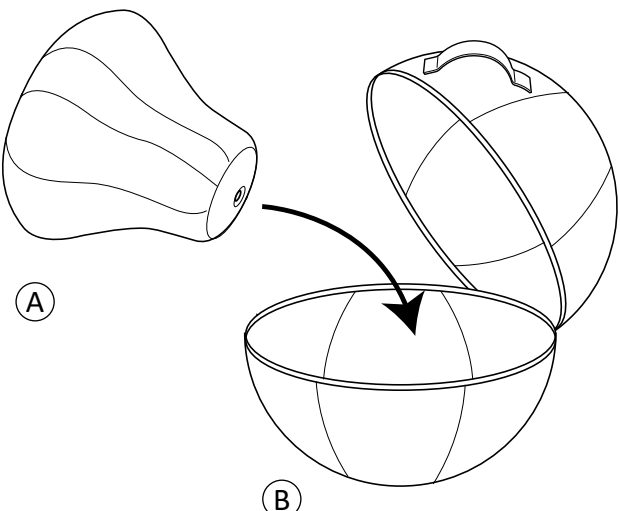

Unilux is committed to an eco-responsible approach and ensures that its products respect this commitment. Indeed, we are very concerned about current environmental issues and we aspire to respond as best as possible to the concerns of our consumers on this subject. Sustainable development is at the heart of our strategy and we act for the environment. You will find below the different certifications that Unilux has and that prove its environmental commitment.

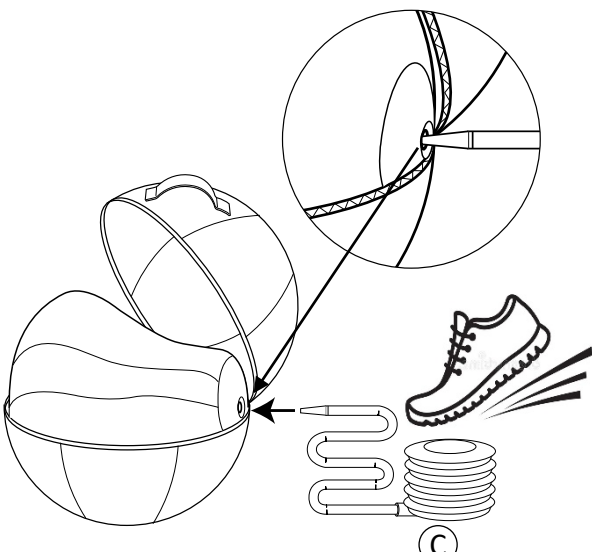

USER GUIDE

---	--

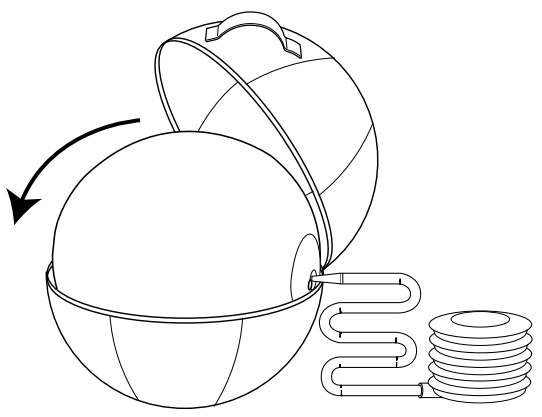

1 Put the PVC balloon inside the felt cover

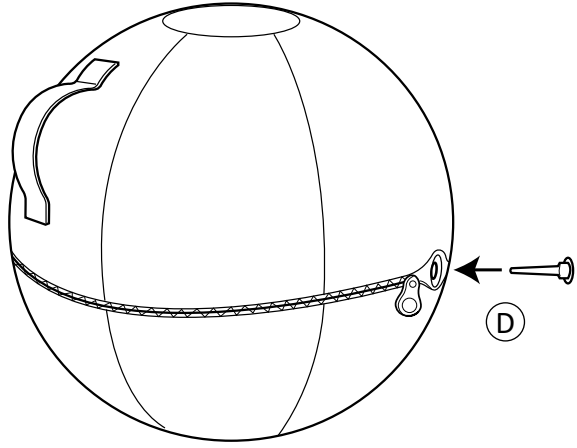

2 Put the valve right next to the closing zip and begin to pump around 4 mins

3 When the balloon is almost inflated, fold down, close the felt cover and finish inflating

4 When the balloon is fully inflated as desired, remove the pump and push in the cap
