# OUR CSR COMMITMENTS

1. All our lighting are **100% repairable** thus limiting planned obsolescence.
2. Reduce our carbon footprint through our **ECO-DESIGN THINKING** approach.
3. Contribute to the preservation of the planet's natural resources by promoting the use of **recycled materials**.
4. Optimize our packaging to control our **transport costs**.
5. Highlight the **talent of our employees** by ensuring social equality.

## Energy class

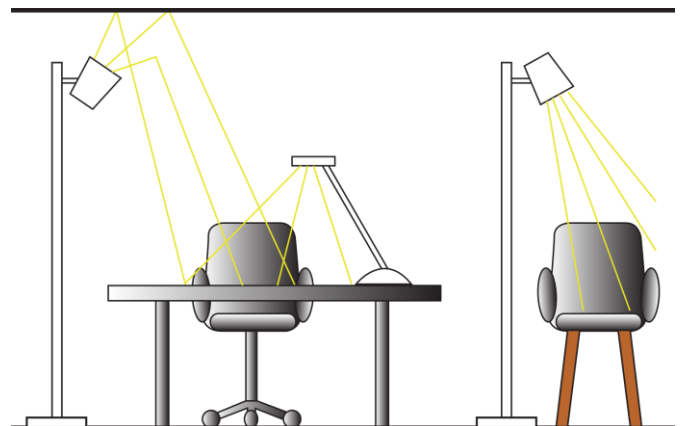

# OUR EXPERTISE

## 1- Floor lamps with direct or indirect lighting: quality lighting that adapts to your activities

Because they're so easy to install and so decorative, floor lamps with indirect or direct lighting are versatile! This floor lamp is ideal for illuminating a specific area of a room, or for adding that original decorative touch that will change the whole atmosphere of the room.

Thanks to its rotating head and upward-directed light that will reverberate off the ceiling or onto the floor, this floor lamp can be used as a secondary light, ideal for concentration, or as a mood light to help you relax when you're taking a break.

Whatever the orientation of the luminous flux, this floor lamp will provide you with high-quality, high-performance lighting. It fits perfectly into any room in your company or home office.

Lighting according to DIN EN 12464-1 \* for the office

- **300 Lux:** deposit, copy, circulation areas
- **500 Lux:** writing, reading, data processing
- **500 Lux:** at the reception and at the counter
- **750 Lux:** technical drawing

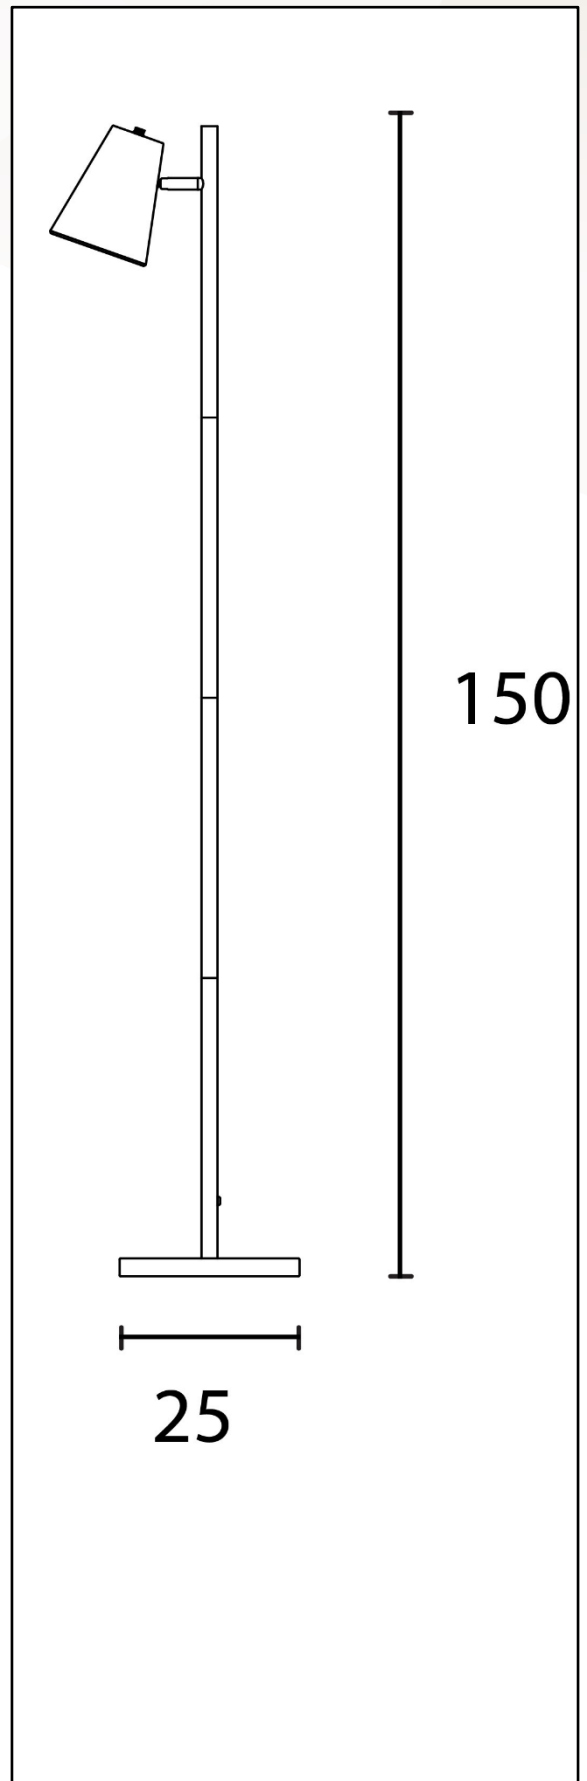

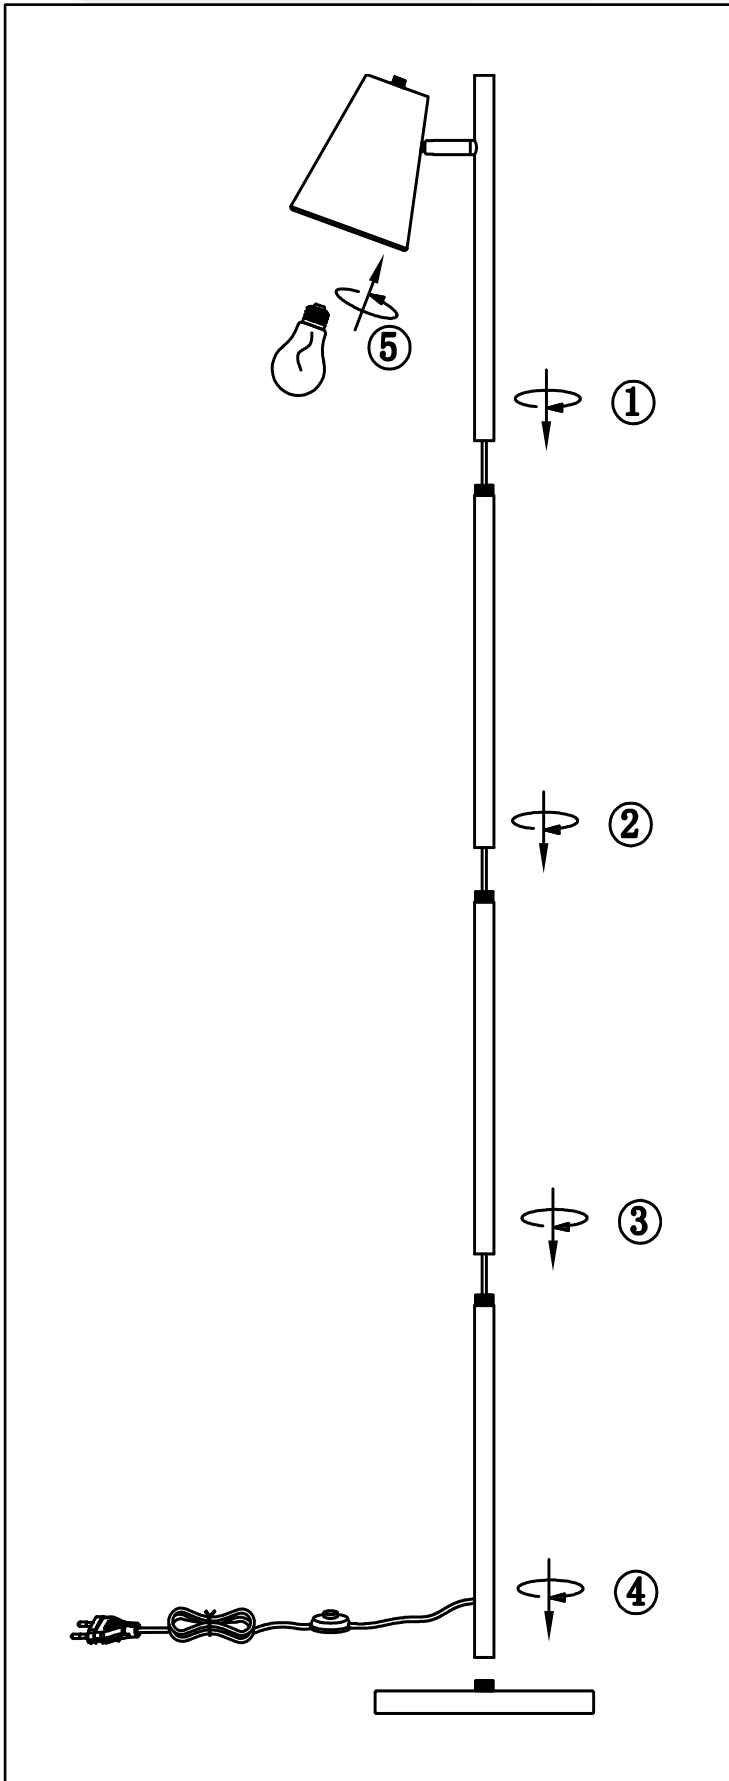

# OUR CERTIFICATIONS

Unilux is committed to an eco-responsible approach and ensures that its products respect this commitment. Indeed, we are very concerned about current environmental issues and we aspire to respond as best as possible to the concerns of our consumers on this subject. Sustainable development is at the heart of our strategy and we act for the environment. You will find below the different certifications that Unilux has and that prove its environmental commitment.

# UNILUX

\* DIN EN 12464-1 (DIN 5035-1): European standard which determines the lighting requirements for workstations in closed places, these satisfying the needs of comfort and visual performance. DIN EN 12464-1 replaced DIN 5035-1
